1. Chemical product a	and Company I	Information		
Name of chemical		: Hydrophilic PTFE type Membrane Filter		
Supplier's n	s and phone number			
Company		: Toyo Roshi Kaisha, Ltd.		
Address Section in charge Phone Fax Mail address Recommended application		: Hibiya-Kokusai BLDG 5F, 2-2-3,		
		Uchisaiwaicho, Chiyoda-ku,		
		Tokyo, 100-0011 Japan		
		: Quality Assurance Division		
		: 81-(0)3-5521-2176		
		: 81-(0)3-5521-2177		
		: trk-hinsho@advantec.co.jp		
		: Liquid filtration		
Use restrictio	ons	: In case of other purpose of use, please		
		contact us to discuss.		
2. Hazard Summary				
GHS Classific	cation			
Physical hazard		: Not applicable.		
Human health hazard		: Not classified.		
Environmental hazard		: Not classified.		
Label elem	ent	: None.		
3. Composition and I	nformation on i	ingredients

# Safety Data Sheet

5. Fire Fighting Measures			
Appropriate extinguishing media	: Plenty of water, dry chemicals, abc, carbon dioxide.		
Unacceptable extinguishing media	: No data available.		
Extinguishing procedure	: In the event of a fire, since harmful gas (HF, COF <sub>2</sub> ,CC CF <sub>2</sub> =CF <sub>2</sub> , CO <sub>2</sub> , etc.) could be generated, firefighter should wear chemical cartridge respirators (organic or acidic gas absorption) or air respirators in addition to the normal protective equipment.		
6. Accidental Release Measures			
Personal precautions, Protective equip	uipment and		
emergency procedures	: No data available.		
Precautions for environment	: No data available.		
Containment and purification pro-			
	: No data available.

9. Physical and Chemical Properties			
Physical state	: Solid, porous film.		
Color	: White.		
Odor	: None.		
Melting point / Freezing point	: 327°C. (melting point)		
Boiling point or initial boiling point and	d Boiling range		
	: No data available.		
Flammability	: Yes.		
Lower limit and Upper limit of explosit	on/ Flammable limit		
	: Not applicable.		
Flash point	: Not applicable.		
Spontaneous firing point	: No data available.		
Decomposition temperature	: Above 260°C		
pH	: No data available.		
Kinematic viscosity	: Not applicable. : Insoluble to water, general purpose solvent.		
Solubility			
n-octanol / water partition coefficient	: No data available.		
Steam pressure	: No data available.		
Density or relative density	: No data available.		
Relative gas density	: Not applicable.		
Particle characteristics	: No data available.		
10. Stability and Reactivity			
Reactivity	: Stable under normal handling.		
Chemical stability	: Stable under normal handling.		
Possibility of hazardous reactions	: High temperatures can result in decomposition of hazardous components.		
Conditions to avoid	<ul> <li>The material will begin to decompose very slowly when the temperature is above 260 degrees Celsius. Above 400 degrees Celsius, the decomposition speed will increase.</li> </ul>		
Incompatible materials	: Metal powder such as aluminum and/or magnesium Fluorinated compound such as $F_2$ and/or $Cl_3F$ .		
Hazardous decomposition products	: Generates harmful Perfluoroisobutylene above 470 degrees.		
	Others generates fluorinated compound		
	(harmfulness is low).		

11. Toxi	cological Information				
	Acute toxicity				
	Oral	: Classification not possible due to lack of data.			
Dermal		: Classification not possible due to lack of data.			
Inhalation: gas		: Classification not possible due to lack of data.			
Inhalation: vapour		: Classification not possible due to lack of data.			
Inhalation: dust, mist		: Classification not possible due to lack of data.			
Skin corrosion / Irritation		: Classification not possible due to lack of data.			
	Serious eye damage and eye irritation	: Classification not possible due to lack of data.			
	Respiratory / Skin sensitization	: Classification not possible due to lack of data.			
Germ cell mutagenicity		: Classification not possible due to lack of data.			
Carcinogenicity		: Classification not possible due to lack of data.			
	Reproductive toxicity	: Classification not possible due to lack of data.			
	Specific target organ toxicity (Single exposure)				
		: Classification not possible due to lack of data.			
	Specific target organ toxicity (Repeated exposure)				
		: Classification not possible due to lack of data.			
	Aspiration hazard	: Classification not possible due to lack of data.			
12. Ecol	ogical Information				
	Ecotoxicity				
Hazardous to the aquatic environment (acute)					
		: Classification not possible due to lack of data.			
	Hazardous to the aquatic environmen	t (chronic)			
		: Classification not possible due to lack of data.			
	Persistence and Degradability	: No data available.			

## 13. Disposal Considerations

Mobility in soil

Ozone layer hazard

Bioaccumulative potential

Dispose in accordance with federal, state and local regulations.

Just like disposal of general industrial waste, ask for industrial waste disposer accepted by prefectural governors or for a local public agency for disposal.

: No data available.

: No data available.

: Classification not possible due to lack of data.

When incinerating the material, use the specific incineration facility. Take appropriate procedure that satisfies Clean Air Act, Waste Disposal and Public Cleaning Law, and Clean Water Law (We recommend disposing the material as industrial waste.).

## 14. Transport Information

Regulatory information and local regulations

: Fire Defense Law under flammable objects.

#### 15. Regulatory Information

Act on the Evaluation of Chemical Substances and Regulation of Their Manufacture etc. Japanese Chemical Substances Control Act.

	:	Existing Chemical Substances (6)-939	Polytetrafluoroethylene
Fire Defense Law	:	Article 9-4 (Standard for storage and handlin	g of hazardous material with less
		than specified amounts) Article 1-12 on regula	ations of hazardous materials, and
		Group 4 specific flammable materials (synt	hetic resins. If a total amount is
		3,000 kg, follow Fire Defense Law. If a tot	al amount is less than 3,000 kg,
		follow the regulations defined by municipal o	rdinance for storage and handling
		of the material.).	

#### 16. Other information

Handling of written contents

Contents of this data sheet are based on materials, information, and data acquirable at this point and are subject to revision due to new knowledge.

In addition, contents such as contained amount, physical and chemical properties, and hazards identification are not subject of any guarantee. These precautions are applied only during standard handling. If the material is used in a special way, take appropriate safety measures that correspond to actual applications and usages.

Each user is responsible to take appropriate measures with due consideration of contents in this sheet.

Please note that this Material Safety Data Sheet is created according to Japanese law.
